SUBJECT: CARLOS BEE BOULEVARD REALIGNMENT – YMCA AT 951 PALISADE STREET TO EXIT ON PALISADE STREET DURING PHASE 2 CONSTRUCTION

Dear Resident/Property Owner/Business Owner:

The Carlos Bee Boulevard realignment construction is currently in Phase 1 where construction activity is occurring on the south side of Carlos Bee Boulevard while vehicular traffic is diverted to the north side. We anticipate completion of Phase 1 and start of Phase 2 around the end of October. Phase 2 will switch the operation whereby construction activity will occur on the north side and vehicular traffic will be diverted to the south side of Carlos Bee Boulevard. Please see reverse side for all phases during the construction.

During Phase 2, construction activity on the north side will not allow cars to exit the YMCA property on Carlos Bee Boulevard. Shortly prior to and during Phase 2, we are asking the patrons of YMCA and the Golden Oak Montessori School to exit on Palisade Street. We anticipate completion of Phase 2 around mid-December. The City recognizes the inconvenience this will cause to adjacent residents and businesses. Every effort will be made to limit such inconveniences to the very minimum and we are doing everything possible to complete the project as soon as possible.

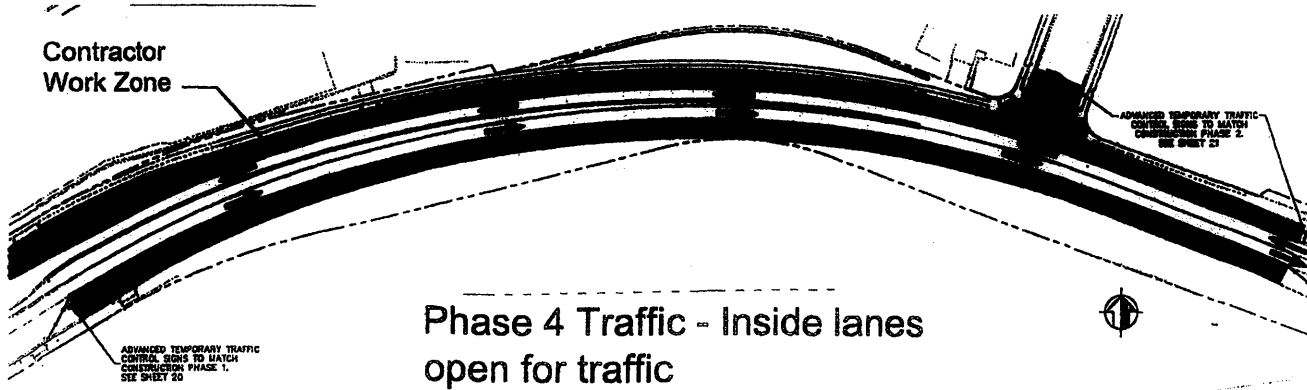

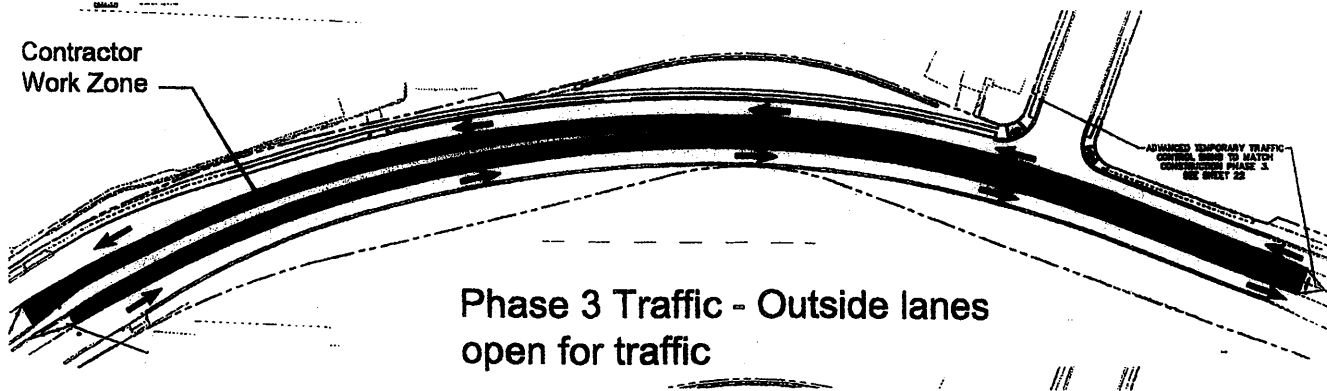

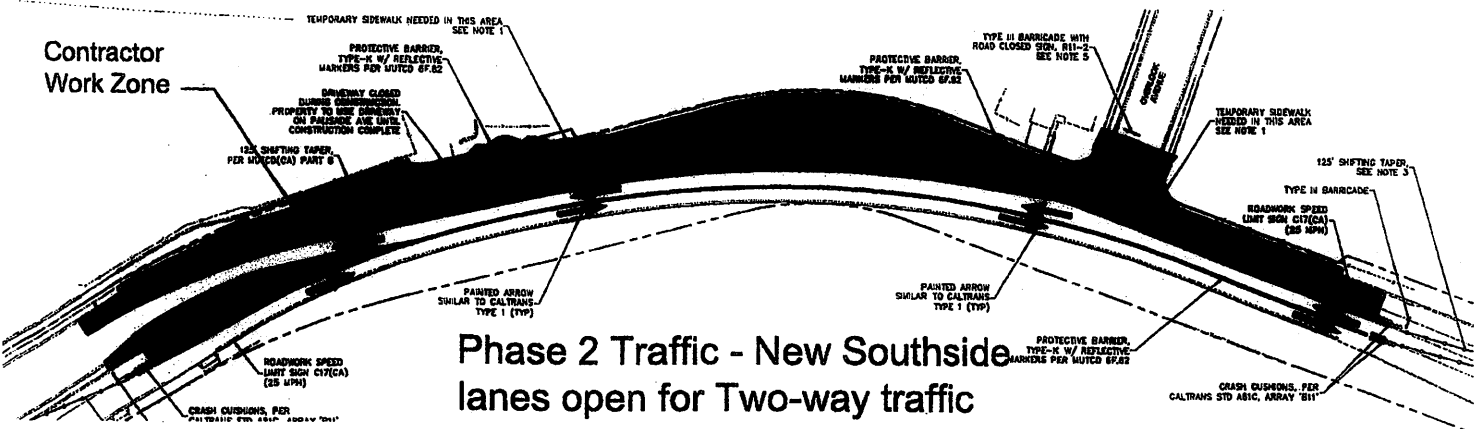

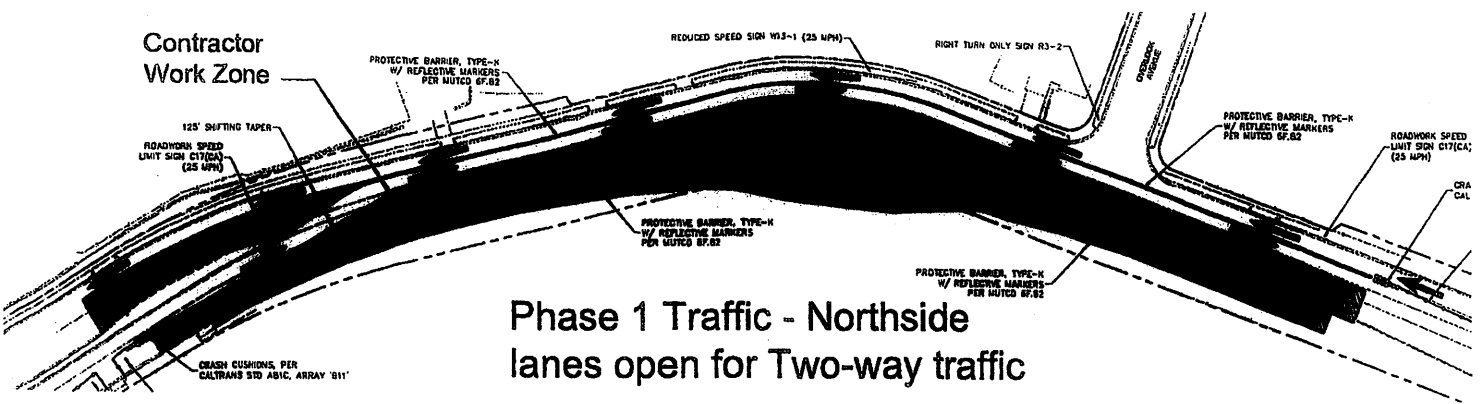

We appreciate your patience and cooperation. If you have any questions, please call Dave Hung, Project Manager, at (510) 583-4752 or Paulo Pulu, Construction Inspector, at (510) 583-4753.

Very truly yours,

Morad Fakhrai  
Deputy Director of Public Works
